Art Unit: 1714

Abstract is objected since it must be a single paragraph.

Every claim numbers showing the status (such as new, currently amended or cancelled) are required in the next communication.

In line 10 of page 2 of the specification, "tert-" should be "Tert-".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6, 10, 11, 23 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohmori et al (US 4,588,781).

Ohmori et al teach copolymers having vinyl ether groups and coatings thereof in abstract and table 2. The instant invention further recites the use of 3-aminopropyl vinyl ether over Ohmori et al. However, Ohmori et al teach employing said 3-aminopropyl vinyl ether at col. 5, lines 42-43. With respect to the claim 6, the recited process has little probative value for the copolymer. Preamble alone has no probative value.

It would have been obvious to one skilled in the art at the time of invention to utilize said 3-aminopropyl vinyl ether in examples of said table 2 since Ohmori et al teach such modification and since the invention is not limited to working or preferred embodiments.

Claims 7-9 and 16-18 reciting a graft copolymerization on a substrate are allowed.

Claims 3-5, 12-15, 24 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
